

#LearningFromLockdown

TOPIC 1: TRANSPORT

Did you know?

A typical car emits about 4.6 metric tonnes of carbon dioxide per year. This is at least a third of the average person's carbon footprint.

DISCUSS

Consider all the short journeys you often make by car - can you think of any that could be made by bike or on foot instead?

Check out cycle and walking routes in St Albans District www.stalbans.gov.uk/walking-and-cycling

ACT!

Use this interactive map to suggest cycle ways and pavement improvements for your frequent journey routes:

<https://www.widenmypath.com/stalbans/>

And replace at least one car journey per week with walking or cycling

SHARE A PLEDGE
